

The following information is found in the IWS Admin and Programming Guide (http://www-03.ibm.com/systems/resources/systems_i_software_iws_pdf/WebServicesServer_new.pdf).

From the picture below

And the description in heading 4 – Subheading: Server programming model

Then the IWS is using the toolbox JDBC driver for connecting from the java bean to the ILE program.

Thus it would be possible to achieve a connection over network with enabling the options for authentication and encryption, that the driver provides.
