Before using formatter

```
--   ===================================================================
--      Select IP Address Counts descending
--   ===================================================================
Select Trim(PWRADR) As "IP Address", Count(PWRADR) As QUANTITY
  From JRNLIB/QAUDITPW
  Group By PWRADR
  Order By Count(PWRADR) Desc, PWRADR
;
--   ===================================================================
```

Comment of line item and then using the SQL formatter

```
--   ===================================================================
--      Select IP Address Counts descending
--   ===================================================================
Select Trim(PWRADR) As "IP Address", Count(PWRADR) As QUANTITY
  From JRNLIB/QAUDITPW
  Group By PWRADR
  Order By PWRADR
    --Order By Count(PWRADR) Desc, PWRADR;
--   ===================================================================
```
